

HAWAII'S E-BIKE LAW FOR THE ROAD

- » In Hawaii, an e-bike is defined as a “moped.” As mopeds, e-bikes are not subject to the same rules of the road as regular bicycles.
- » E-bike riders must carry an operator’s license and are subject to registration requirements. E-bikes are not subject to insurance requirements.

- » Helmets are required for operators under 18 years of age. There is a 15 year age minimum for e-bike use. E-bikes are not allowed on sidewalks. Consult your local government for information on whether e-bikes and mopeds are permitted on bike paths.

* The following Hawaii laws are referenced: Haw. Rev. Stat. §§ 14:249-1, 17:286-26, 17:291C-193 through 207.

eMTB GUIDELINES

- » On federal, state, county and local trails, e-mountain bike (eMTB) access varies significantly.
- » Generally, any natural surface trail that is designated as open to both motorized and non-motorized uses is also open to eMTBs.
- » eMTBs may not be allowed on trails managed for non-motorized activities.
- » Do not ride your eMTB in areas where the local rules are unclear. Ride legally and only on authorized trails to show that mountain bikers are responsible trail users.
- » When in doubt, ask your local land manager about access to specific trails. Local land rules change frequently.

HAWAII'S E-BIKE LAW FOR TRAILS

- » LOCAL: Consult your local land management agency.
- » STATE: The Hawaii Department of Land and Natural Resources has stated that eMTBs are not allowed on natural surface trails. Contact the department for the most up to date information. PeopleForBikes is monitoring this policy and will update this document as needed.
- » FEDERAL: On federal lands, eMTBs are considered motorized vehicles and have access to motorized trails. However, Hawaii has minimal federal lands where mountain biking is allowed.

GREAT eMTB RIDES IN HAWAII

- » **Haleakala Shuttle**
Maui | 18 miles
- » **Mana Road Gravel Route**
Waimea | 28 miles

With an e-bike, bicyclists can ride more often, farther, and for more trips.

Electric bicycles are designed to be as safe as traditional bicycles, do not compromise consumer safety, and benefit bicyclists who may be discouraged from riding a traditional bicycle due to limited physical fitness, age, disability or convenience.

In many states, e-bikes are regulated under antiquated laws primarily aimed at combustion engine vehicles such as mopeds or scooters. PeopleForBikes and the Bicycle Product Suppliers Association are clarifying state laws governing the use of e-bikes in the U.S. Every state’s law is different, but the objective is to ensure that low-speed e-bikes are regulated similarly to traditional, human-powered bicycles.
